

Collections Gets You More

Get Company Data Archive Express for FREE! Now bundled with Collections Management.

Company Data Archive (CDA) Express provides a simple way to move historical information from your Microsoft Dynamics® GP 'live' company to an 'archive' company. An easy-to-use interface allows you to select a cut-off date as well as the modules you would like to archive.

Benefits

Eliminate Clutter in Inquiries and Reports

Condense and streamline lookup windows and reports to contain only new and relevant data. No more scrolling through old transactions.

Increase Microsoft Dynamics GP Performance

Improve posting and other performance by reducing the size of the tables in your live company.

Enable Faster Microsoft Dynamics GP Upgrades and Backups

Less data in your live company means faster upgrades and backups and less downtime. Reduce the data that needs to be backed up nightly.

Reduce Hardware Costs

Archive data to a less expensive disk drive to free up space on your higher-performance storage.

Easily View Historical Data in Your Archive Company

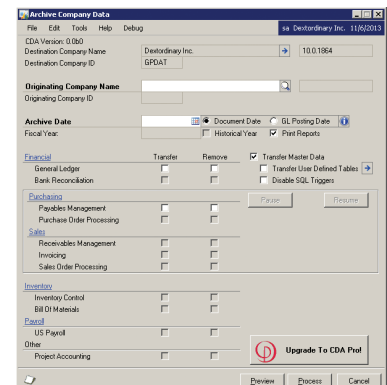

Access your historical data in a familiar Microsoft Dynamics GP environment.

Easy to Report

Table Name	Index	Fragmentation	Recommendation
CM20100	AK2CM20100	18.10182%	Reorganize Index

GL10110	AK4GL10110	15.38462%	Reorganize Index

Index Fragmentation Report

Easy to Run

CDA Archive Window

How It Works

Familiar User Experience

Generate reports, utilize inquiry windows, use smartlists, etc.; exactly as you would in other GP companies

Archive at Your Leisure

The archiving of customer and vendor data can be paused during peak business hours and resume as needed.

Repair Fragmented Indexes

Optimize fragmented indexes in any company in Microsoft Dynamics GP with a Microsoft recommended SQL script.

See Transaction from Your 'Live' and 'Archive' Company in One Window

Even though your data is in separate databases, CDA provides an interface to see live and archived transactions in a single window.

Archive on a Schedule

CDA allows you to continue to archive into the same company so you can move data quarterly or annually.

Transfer and/or Remove Data

Select which modules you wish to transfer and/or remove information from. This provides you with the option to transfer and review archived data before removing it from your live company.
